Childhood
Music*

Childhood Music Program

Our Early Childhood Music (ECM) Program aims to develop the understanding and enjoyment of music. We provide opportunities for all students to learn through participation in musical activities at levels consistent with their stage of development, in a playful and creative learning environment. Age groups are as follows:

Little Sprouts: Toddlers, 1-3 years

Big Sprouts: Preschoolers, 3-5 years

Intro Musos: Early stage 1/ Stage 1

"When I began taking my girls to ECM, Billie was hiding behind my legs. Within weeks she was a chatty, bubbly kid. It's such a lovely fun environment for kids to express themselves and learn. Both my girls are now performing solo at end of term concerts at the Con. It's hard to imagine they were ever shy when I watch them entertain"
ECM parent

The Benefits of Childhood Music

- Music is a natural and important part of a young child's growth and development, nurturing their love of music lays a firm foundation for future learning.
- Research shows that music can foster social, communication and cognitive skills.
- Children benefit from music by integrating the learning process in a creative and practical way.
- Confidence, self-esteem, and the ability to deal with challenges are enhanced through music education.
- Music develops concentration and listening skills. It can also improve co-ordination and physical development.
- Early Childhood Music classes gives your child a foundation to continue a lifelong journey of music.
