BENEFITS OF QUALITY MUSIC EDUCATION

The study of music combines the development of affective, cognitive and psychomotor domains in the act of making music.

At an individual level, music is a medium of personal expression. It enables the sharing of ideas, feelings and experiences.

The nature of musical study also allows students to develop their capacity to manage their own learning, engage in problem-solving, and work collaboratively.

NSW Board of Studies

SCHOOL BAND PROGRAM

Playing in a band complements a student's individual instrumental tuition and develops ensemble awareness. This involves communication with other ensemble members, and a focus on the musical concepts of dynamics and expressive techniques, texture, and structure.

NRC tutors are able to tailor band programs to meet the needs of your school and best showcase the talents of your students.

“The Music in Schools program adds an extra dimension to our little community school. The NRC teachers collaborate with us on performances and provide authentic feedback on our student's growth.”
